Rosink Rim & Tire Washer RRW

Concept

The **Rosink Rim & Tire Washer RRW** is a fully automatic, closed system for cleaning of rims and/or complete wheels. The washing time between 1 to 5 minutes is adjusted via a timer. After starting the program, the inserted wheels or work pieces are efficiently cleaned via a heated washing medium under high pressure by means of special flat jet nozzles. A propulsion nozzle rotates the tire and/or the support basket. The washing pressure has been chosen in such a way that damage to the tire can be excluded.

All advantages

- Tanks, housing and nozzle block in 1.4301 stainless steel
- Flexible due to closed loop
- Fully automatic cleaning
- Fast amortization
- Suitable for aluminium and steel wheels
- Particularly gentle cleaning for tire and rim
- Environmentally friendly and economical
- Parts cleaning through support basket is possible
- In case of big throughput, it can be equipped with roller conveyer
- All disadvantages of granules and high pressure are avoided
- Arbitrary colour of the machine

Specification

Height	850 mm
Width	1,100 mm
Depth	1,400 mm
Weight	180 kg
Connected voltage	230 / 400V 50 Hz / 3 N / PE
Pump motor	4 kw
Conveyor capacity	160 l / min at 7.0 bar
Protection machine	3 x 16 A
Power plug	16 A CEE
Max. unit weight	100 kg
Wheel diameter	14" – 22"
Wheel width	5.5" – 11"
Filling quantity	ca. 150 l

Additional benefit: with support basket also suitable for the parts cleaning!
